## SKILLS AND EXPERTISE

- Frontend: React.js, Next.js, Tailwind CSS, HTML, CSS
- Backend: Node.js, Express.js, MongoDB
- Tools: Git, GitHub, Firebase
- Concepts: REST API, CRUD Operations, Problem Solving

## EDUCATION

**Bachelor's (Honours) in Mathematics**  
Sirajganj Government College / 2025 –

**Higher Secondary Certificate (HSC)**  
Summit School & College / 2022 – 2024

## PROJECT

### Global Nexus – Import/Export Hub

*Tech Stack: React.js, React Router, Firebase Authentication, Tailwind CSS, Context API, REST API ([Live](#))*

- Developed a web application for managing import and export product information with user authentication and protected routes
- Implemented product listing, product details, and user-specific export/import management features
- Implemented full CRUD operations using RESTful APIs
- Integrated Firebase Authentication for secure login, registration, and logout functionality
- Built a responsive and user-friendly interface using Tailwind CSS and reusable React components

### Green Nest – Plant Store Web Application

*Tech Stack: React.js, React Router, Firebase Authentication, Tailwind CSS, Context API, REST API ([Live](#))*

- Built a modern plant store web application with dynamic product catalog and detailed plant information
- Implemented secure user authentication using Firebase with protected routes
- Added interactive UI features including animations, sliders, and toast notifications
- Designed responsive layouts optimized for multiple screen sizes
- Implemented full CRUD operations using RESTful APIs
